

Parts List:

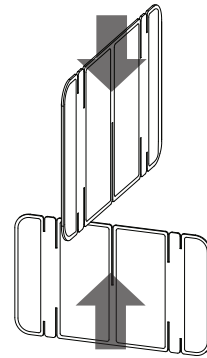

10 x Felt Modules

1

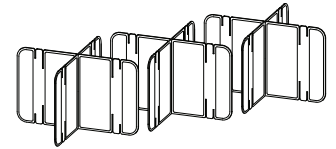

Unpack the Nomad System by cutting tape carefully to avoid damaging modules.

2

Insert one module into the other along the central slot creating an X assembly shown. Repeat this step for all modules.

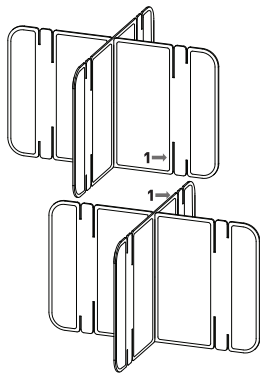

3

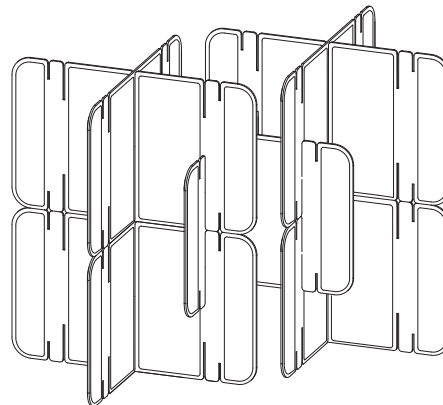

Arrange one row of X assemblies in the desired wall perimeter. Leave approximately one inch (2.5 cm) between X assemblies.

Closed Assembly:

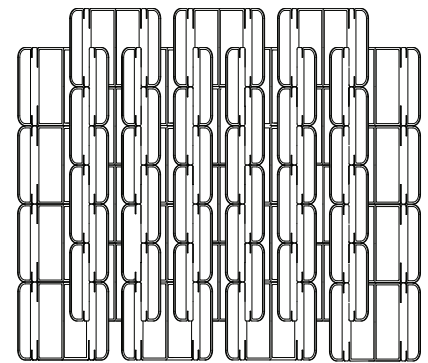

4

Insert subsequent rows of X assemblies into the bottom row. Use the long side slots (#1) for closed assemblies. Repeat this step to desired height.

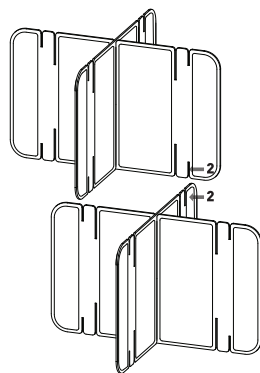

Single box closed assembly

Finished! Use the selected slot throughout the entire assembly. Each box contains 5 sqf [46 sqm] in the closed assembly.

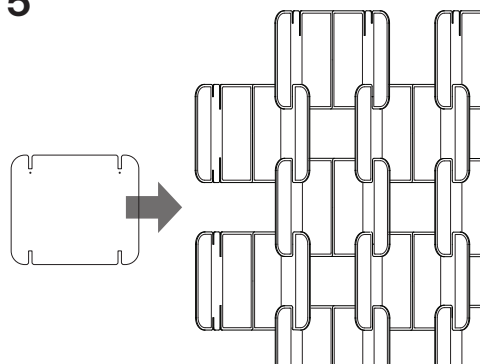

Open Assembly:

4

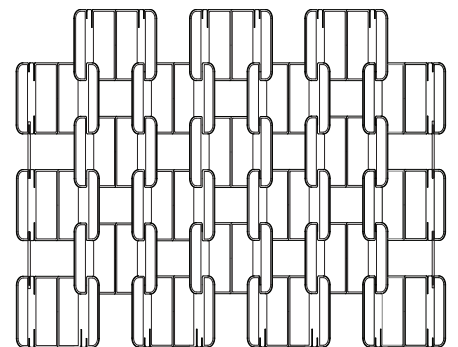

Insert subsequent rows of X assemblies into the bottom row. Use the short side slots (#2) for open assemblies. Repeat this step to desired height.

5

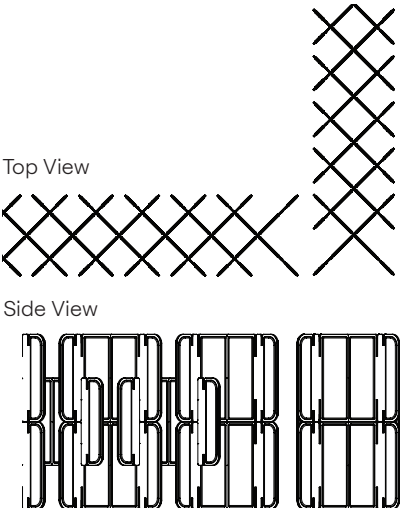

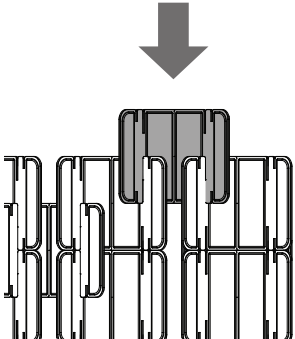

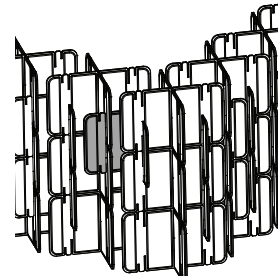

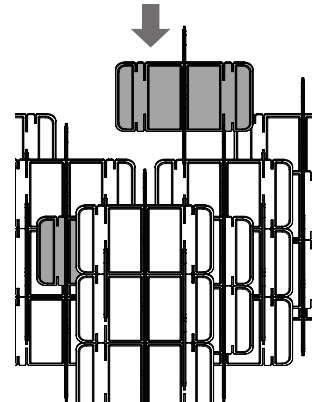

Insert aluminum spacers at the end of each open row to prevent sagging and improve stability.

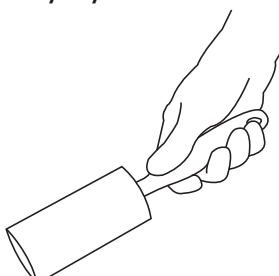

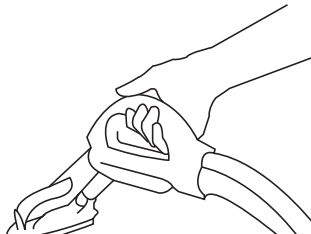

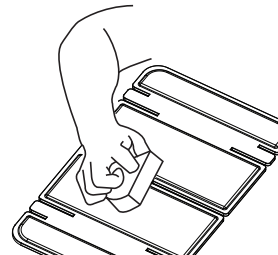

Finished! Use the selected slot throughout the entire assembly. Each box contains 7 sqf [65 sqm] in the open configuration.

Turning Corners:

<p>1</p>  <p>Top View</p> <p>Side View</p> <p>Arrange two walls at a 90 degree corner and build them two modules high.</p>	<p>2</p>  <p>Connect the walls together using an X assembly.</p>	<p>3</p>  <p>Continue building the wall with another row of modules.</p>	<p>4</p>  <p>Add another X assembly to the opposing connection point. Repeat steps 2-4 to desired height.</p>

How to Clean:

<p>Everyday Care</p>  <p>Vacuum modules with a handheld attachment to avoid dust and dirt buildup, especially in high traffic area installations. Alternatively lint, dirt, hair, or fuzz can be easily removed with a lint roller or tape.</p>	<p>Spot Cleaning</p>  <p>Spot clean to eliminate small stains or dirt. Start by removing loose dirt with a vacuum. Wet a soft cloth, with warm water, and dab the stain. Repeat until the stain has been removed. Tougher stains can be removed using a small amount of delicate hand-washing detergent.</p>	<p>Washing Modules</p>  <p>Soiled modules can be washed in a sink. Use warm water and clean by dabbing with cloth or absorbent material. Remove excess moisture with a dry towel. Lay modules to dry on a flat surface with absorbent material below. Turn modules over periodically until they are completely dry. Do not scrub.</p>	<p>Disinfecting Modules</p>  <p>Nomad System Felt can be cleaned with alcohol or a 1:10 bleach and water solution (approximately 5000 ppm) for high disinfection. For best results leave the solution at least one minute on the module surfaces. Clean after with a damp cloth using warm water.</p>
